EXPERIENCE

Zora Terminal

Dec. 2024 – Sept. 2026

Founder & Full-Stack Engineer

- Built and shipped a full-stack product from 0→1 to 10K+ users and \$10M+ in on-chain volume; reverse-engineered Zora's undocumented GraphQL API and built a custom cross-launchpad indexer.
- Built a custom API on top of the index that became a production dependency for Bankr, a Coinbase-backed multichain product with \$1B+ in volume.
- Built a custom model-routing system that selects specialized models for trading and research, powering an LLM agent with 21 tools across market data, creator profiles, and comment threads
- Developed a domain-specific model evaluation system across 8 models, raising agreement with human judgment from 58% to 85%, and introduced production safeguards against prompt injection.

Showtime Technologies

Aug. 2022 – Jul. 2023

Product Generalist

- Joined as the first product hire and helped establish the product and data function, working closely with engineering and design from product definition through launch.
- Designed and launched Creator Updates, a creator-to-fan distribution product that let creators distribute digital collectibles directly to their fans, contributing to 1M+ digital collectibles minted.
- Ran customer interviews and analyzed transcripts; translated findings into technical specs for a 4-person engineering team and shipped onboarding changes that cut drop-off 15%.

Hotels.ng

Feb. 2022 – Aug. 2022

Software Engineer

- Shipped receipts end-to-end across generation, formatting and delivery for a 10,000+ hotel network.
- Built offline-first behavior for unreliable network conditions and eliminated recurring synchronization bugs between backend and mobile systems.
- Established code-review and deployment practices for a 7-person engineering team, cutting review cycles from days to hours.

PROJECTS

AnnabelleAI | *Next.js, Telegram, OpenClaw(VPS), Cloudflare, Supabase, OpenRouter, Replicate*

Feb. 2026

- Built a generative creative system that turns a product URL into finished UGC-style video ads, automating research, creative direction, scripting, generation and post-production; shipped 20+ videos.
- Engineered a brand consistency system that maintained character identity and visual continuity across independently generated scenes, making multi-scene AI creative more reliable and production-ready.
- Built a model-selection and evaluation system across image, video and language models to optimize creative quality and generation cost across the pipeline

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Go, SQL

Frontend: React, Next.js, Tailwind CSS

Backend & Tooling: Node.js, PostgreSQL, Supabase, Cloudflare, GCP, GitHub Actions

AI & Creative Systems: LLM agents, image/video generation, model evaluation, prompt pipelines, multi-model orchestration, generative creative systems

EDUCATION

University of Lagos

2020 – 2025

Bachelor of Science in Civil Engineering

Lagos, Nigeria
